

Training Outline

IMPEL – Nancy Isarin

1. Trainer's professional experience in brief

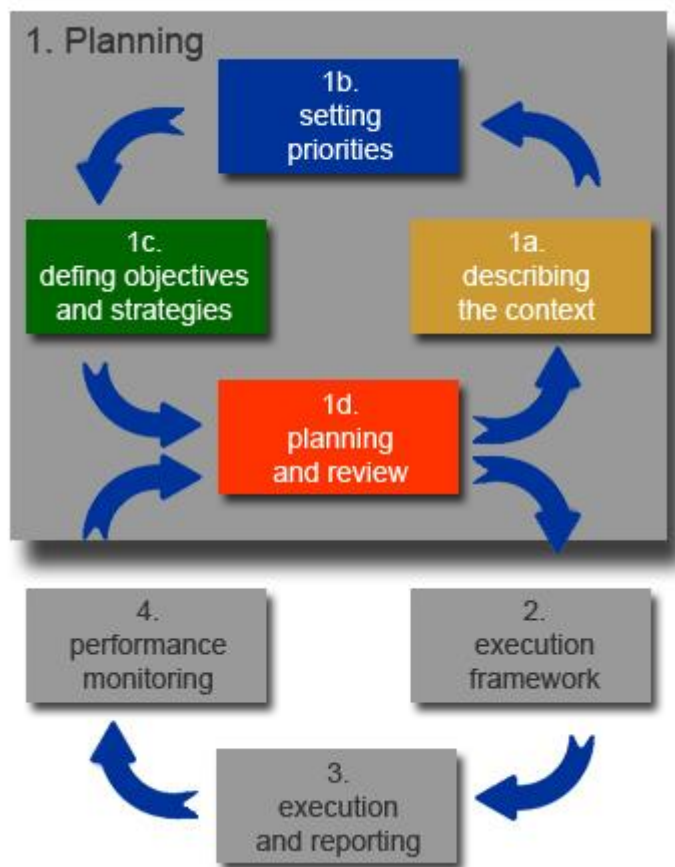

| | |
|--|--|
| <p>-Insert your photo here- (optional)</p> | <p>Description of your professional background in 15 to 30 lines:</p> <p>As founder of Ambiendura Unipessoal Lda.; an environmental consultancy, I provide hands-on advice concerning the implementation, monitoring and enforcement of environmental laws and multilateral environmental agreements; and concerning inter-agency and cross-border cooperation.</p> |
| <p>Name: Nancy Isarin</p> <p>Current Position & Organization: Environmental Consultant, Ambiendura</p> <p>Project and Communication Officer, IMPEL.</p> <p>Contact: Email: Nancy.isarin@ambiendura.com Nancy.isarin@impeleu Phone: +351 91 3241900 Skype: Ambiendura</p> | <p>For the past seventeen years I have worked in the area of compliance promotion and enforcement of environmental legislation and in establishing and assisting cross-border networks that collaborate on inspection and enforcement matters. After my study in Environmental Science, and my thesis on Environmental Crime, I started my career in 1998 as environmental inspector at the Netherlands' Environmental Inspectorate. After eight years I decided to start working as an independent environmental consultant. Examples of projects I have been involved in are the IMPEL Secretariat, trainings for the ECRAN Network, developments of capacity building tools on the Basel, Rotterdam and Stockholm Conventions for UNEP.</p> |

2. Learning objectives

After completing this module on IMPEL tools participants will have a better insight in some (not all) of the tools developed by IMPEL, enabling them to choose the appropriate tools for their specific needs and to deal with situations in their own country.

3. Training session abstract

This module will highlight the following tools: firstly it will introduce the Environmental Inspection Cycle, as developed by IMPEL, followed by some tools that related to steps and phases of the Environmental Inspection Cycle. The EIC is developed to support the inspectorates to plan, perform, report and evaluate their inspection activities.

Secondly some area specific tools will be presented, namely:

- The iDepend tool, which supports the regulatory community in choosing different / alternative approaches to support compliance and improve the environmental behaviour of companies:
- Specific guidance related to Landfills, pig farming and waste sites.

4. Suggested reading list, sources, useful links

- **Environmental Inspection Cycle:**
